Presentation topics (Please select 1 to 3 that best represent the submitted work):

- | | |
|--|--|
| ☐ Occupational Exposures | ☐ Mental Health |
| ☐ Agricultural Health | ☐ Environmental Exposures |
| ☐ Agricultural Safety | ☐ Respiratory Health |
| ☐ Ergonomics | ☐ Indigenous Health |
| ☐ Injuries | ☐ Community Health |
| ☐ Rural Health | ☐ Community-based Research |
| ☐ One Health | ☐ Special Populations |
| ☐ Rural Healthcare | ☐ Virtual Care |
| ☐ Health Promotion and Policy | ☐ Innovations in Healthcare |
| ☐ Research Methods | ☐ Emerging Issues |
| ☐ Knowledge Translation | ☐ Artificial Intelligence |
| ☐ Outreach | ☐ Mining Health and Safety |
| ☐ Forestry Health and Safety | ☐ Education |
| ☐ Fisheries Health and Safety | ☐ Other |

Presentation type (select in drop down menu)

- | | |
|--|---|
| ☐ Podium presentation | ☐ Panel discussion |
|--|---|

Abstract format:

Introduction and Purpose (600 characters or ~100-150 words)

Summarize why the project was undertaken, how a research gap was addressed, or what information justified the objectives of the project. In the case of a programmatic abstract, summarize the need for the program and the educational outcomes realized as part of the program. For panel proposals, please provide a brief description of the session's topic which should be emerging, popular or trendy, or addressing specific populations.

Methods / Process (600 characters or ~100-150 words)

Summarize the methods used to carry out the project objectives. Discuss samples or target audience, the data or information used, and how the samples were collected. In the case of a programmatic abstract, discuss the target audience and major points of the program. For panels, provide the proposed speakers, the session leader/facilitator, and their expertise. Aim for diversity in representation (e.g. geographical, gender, career stage).

Results / Findings (600 characters or ~100-150 words)

Summarize the major findings or educational outcomes. For panels, identify the primary audience.

Discussion / Implications (600 characters or ~100-150 words)

Provide context to the findings. What do they mean in terms of the agricultural or rural health and safety audience, locally, regionally, nationally, and internationally? What are the high-level conclusions from the research or program? Describe the impacts of this work and how others may use them or any further relevant information. For panel discussions, describe the anticipated outcome of the session.

Abstract format:

Introduction and Purpose (600 characters or ~100-150 words)

Summarize why the project was undertaken, how a research gap was addressed, or what information justified the objectives of the project. In the case of a programmatic abstract, summarize the need for the program and the educational outcomes realized as part of the program described. For hands-on demos, summarize the need for the object of the demonstration.

Methods / Process (600 characters or ~100-150 words)

Summarize the methods used to carry out the project objectives. Discuss samples or target audience, the data or information used, and how the samples were collected. In the case of a programmatic abstract, discuss the target audience and major points of the program. For demonstrations, indicate here what space requirements or resources (electrical outlets, number of tables, etc.) are required for your hands-on demonstration and an estimated duration of a single run of your demonstration.

Results / Findings (600 characters or ~100-150 words)

Summarize the major findings or educational outcomes. For demonstrations, identify the intended audience,

Discussion / Implications (600 characters or ~100-150 words)

Provide context to the findings or information presented. What do they mean in terms of the agricultural or rural health and safety audience, locally, regionally, nationally, and internationally? What are the high-level conclusions from the research or program or the hands-on demonstration? Describe the impacts or implications of this work and how others may use them. Provide any further relevant information here.
